STOCK INFOSHORT SELL

Ant Digital Technologies released EnergyTS, a time-series foundation model for energy and power, capable of optimizing operational strategies for the renewable energy sector by precisely predicting power generation and supply-demand dynamics.

EnergyTS boasts advantages such as multi-scale training, multimodal fusion, and multi-task learning, making it widely applicable to scenarios including photovoltaic power generation, wind power, energy storage, microgrids, electricity trading, and virtual power plants.

According to evaluations in photovoltaic scenarios, this industry-specific model outperforms mainstream general-purpose time-series models such as Google’s TimesFM-V2.0 and Amazon’s Chronos-Large in power generation prediction accuracy on industry test datasets.
